PRAJNAN PRAYAS NAYAK

Bhubaneswar, Odisha | +91 63707 31503 | Nayakpragyan088@gmail.com
LinkedIn | GitHub

Professional Summary

Computer Science and Engineering undergraduate at SOA University, ITER, interested in machine learning, computer vision, embedded systems, and wireless communication. Focused on developing technology-driven solutions through practical projects, technical learning, and collaborative teamwork. Also experienced in campus event coordination and student-led initiatives.

Education

Siksha 'O' Anusandhan (SOA) University, ITER — Bhubaneswar, Odisha
B.Tech in **[Confirm Engineering Branch]** — *[Expected Graduation Year]*

Vikash Residential School, Bhubaneswar–Khurda — 2024
Senior Secondary Education – CBSE Class XII — **72.3%**

St. Xavier's High School, Charampa, Bhadrak — 2022
Secondary Education – CBSE Class X — **84.8%**

Technical Skills

Programming Languages: Python, C, C++, Java (foundational)

AI and Computer Vision: Image Processing, Image Classification, Machine Learning Fundamentals, X-ray Image Analysis

Embedded Systems and IoT: ESP32, Arduino, Microcontrollers, Sensor Interfacing, Embedded Systems Fundamentals

Wireless Communication: Wi-Fi, Local Wireless Networking, Device-to-Device Communication, Offline Connectivity

Web Development and Databases: HTML, CSS, JavaScript, Database Fundamentals

Tools and Platforms: Git, GitHub, Visual Studio Code, Linux, Jupyter Notebook

Core Concepts: Data Structures, Computer Networks, Object-Oriented Programming, Problem-Solving, Team Coordination

Projects

X-Ray Threat Detection System — *Computer Vision / AI*

- Explored an AI-assisted threat detection system designed to identify potentially dangerous objects in X-ray baggage images.
- Focused on image preprocessing, visual feature analysis, and machine learning-based threat classification.
- Aimed to support security screening through automated image analysis and decision-support capabilities.

ESP32-Based Offline Vegetable Marketplace — *IoT / Wireless Communication*

- Designed an offline marketplace concept that enables local users to list, discover, buy, and sell vegetables through an ESP32-based wireless network.
- Explored ESP32 Wi-Fi access-point functionality to provide local marketplace access without requiring conventional internet.
- Focused on affordable digital trading and improved connectivity for local vegetable vendors and customers.

Internship and Training

Summer Internship and Training Programme — *July 2026*
National Institute of Technology (NIT), Rourkela

- Completed a summer internship and training programme in the Department of Electronics and Communication Engineering.
- Participated in technical training and practical learning activities during the programme.

Positions of Responsibility

Event Management Team Member — *Innovation and Entrepreneurship Cell (IEC), SOA*

- Assisted with campus event planning, logistics, volunteer communication, and coordination among organising teams.
- Collaborated with team members to support smooth event execution and effective participant coordination.

Achievements

- **Proxima – Top 10 Teams:** Secured a position among the Top 10 teams for the **HR Complaint Management System** project.

Areas of Interest

Artificial Intelligence, Computer Vision, Internet of Things, Embedded Systems, Wireless Communication, Software Development, and Technology-Driven Innovation.
